

Information regarding REACH and SVHC substances, January 2019

Our position in the supply chain is "down-stream user". Raw materials used in our products were registered or pre-registered by our supplier.

The Candidate List (SVHC substances) of the EU decree 1907/2006 (REACH) was extended on 15.01.2019. 6 substances were added. The number of substances on the Candidate List (SVHC substances) is 197 and can be accessed here www.echa.europa.eu/candidate-list-table

We would like to advise you, as a customer of DKL Metals Ltd, that some products may contain LEAD above the 0.1% limit and/or CADMIUM above the 0.1% limit. Customers who have purchased these products will be informed of this on the Delivery Note and labels of the purchased product. This will also be advised in our Technical Data Sheet.

Other products delivered to you by our company do not contain any other substances of concern (SVHC substances) above the 0.1% limit.

Please accept our apologies as we cannot complete questionnaires sent to us due to the volume of requests we receive. However, we hope that the information in this document includes all the information you need.

Robert Jardine
Production Manager
